DETAILED ACTION***Drawings***

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: Reference 15 is not found in Figure 4, as provided in paragraph 13 of the specification. Reference 15 is however found in Figure 1, but a description in relation to its presence in Figure 1 is not provided for in the specification. Furthermore, although an opening for reference 15 is shown in Figure 4, a corresponding opening is not provided for in Figure 2 or Figure 3. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

Claims 1 and 4 are objected to because of the following informalities:

Regarding claim 1, line 4 of the claim appears to contain grammatical errors or incomplete language, “a flush base plate of package *foldable for building box*, ...” (emphasis added.)

Regarding claim 4, line 4 of the claim appears to contain a grammatical error or incomplete language, “a casing built with a base plate of package, ...” (emphasis added.)

Appropriate correction is required.

Allowable Subject Matter

Claims 1 and 4, as well as their corresponding dependent claims (claims 2 and 3, and claims 5 and 6, respectively) are in condition for allowance pending acceptable correction of the previous claim objections.

Regarding independent claims 1 and 4, the prior art is not found to teach or fairly suggest, a digital camera having a base plate which includes a fixing base glued thereon, where the fixing base includes a battery seat and circuit board seat with a perforated fixing hole for inclusion of a viewfinder.

Conclusion

This application is in condition for allowance except for the following formal matters:

Objections to claims 1 and 4;

Correction to Drawings.

Prosecution on the merits is closed in accordance with the practice under
Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO**
MONTHS from the mailing date of this letter.
